Read the speech segment given below and fill in the blanks with the appropriate discourse markers. Observe the tone and the punctuation of the passage and choose only the most fitting answer for every blank.

Neil Gaiman on Writing about Different Countries and Cultures

There are lots of cultures that I haven't worked with. One reason why I am always hesitant is [that] the last thing you want to become as an author is a [i] ____ cultural tourist. And you [ii] ____ don't want to sort of feel like you've signed up to the Myth of the Month club, and there was definitely, while I was doing *The Sandman*,– a little bit in *American Gods*– that feeling that, [iii] ____, if I did it wrong, if I did it without respect, I could become some kind of a cultural tourist. [iv] ____, there are places where I would still love to go. If you go and see something, you will always come away with things that are brighter, sharper and stranger than you could have imagined. The kind of food that's served, the kind of road signs, what the house roofs look like– it's stuff that you [v] ____ wouldn't imagine.

Transcribed from: "Neil Gaiman - Meet the Writers." *YouTube*, uploaded by BNStudio, 12 Jul. 2011.

Based on the above data, answer the given subquestions.

Given below is a short essay excerpted from *The Statesman*. Read the essay and answer the sub-questions.

Peace Is Getting More Costly Everywhere

In the current global climate, the expense associated with maintaining peace is increasing at a rapid pace. Peace has become a valuable commodity in various regions across the globe, ranging from the simmering borders of Eastern Europe to the volatile pockets of the Middle East, and from the tumultuous corners of Sub-Saharan Africa to the rising tensions in the South China Sea. The escalation of global conflicts is not necessarily a recent occurrence. Throughout history, humanity has experienced prolonged periods of conflicts and strife. The evolving nature of these conflicts is characterised by an increasing level of intricacy and breadth. The nature of contemporary conflicts has become more transnational, characterised by the rise of non-state entities, cyber warfare, and the expansion of asymmetric warfare. These factors (1)_____ the expenses associated with peace-building.

The protracted conflict in Syria is an example. After 12 years, the situation in Syria serves as a poignant example of the high cost of achieving peace. The initial civil unrest against the regime of Bashar-al-Assad has evolved into a complex crisis that involves multiple international stakeholders. The significant impact on both human life and infrastructure is profound; however, it represents only a single aspect of the actual expense. The subsequent refugee crisis has placed a significant burden on the resources of neighbouring nations and has caused political instability that extends well beyond the borders of Syria. The international community has allocated significant financial resources towards humanitarian aid, refugee resettlement, and military interventions, with no clear resolution in sight.

The dispute in the South China Sea presents a distinct, but equally concerning example of the increasing cost of maintaining peace. Several nations (2.a.) _____ their ownership over this crucial maritime area, resulting in a progressively growing military presence in the (2.b.) _____. In addition to the substantial defence expenditures, there exists an intangible expense associated with the (3) _____ tension. The possibility of a significant conflict in one of the most heavily trafficked sea lanes worldwide presents a potential disturbance to international trade routes, which could result in far-reaching economic implications.

The ongoing conflict in the Sahel region of Africa presents a clear depiction of the increasing expenses associated with maintaining peace. The (4.a.) _____ of violent extremism, intercommunal

conflicts, and food insecurity has resulted in a significant (4.b.) ____ in displacement, with millions compelled to abandon their residences. The financial expense required to reestablish harmony and reconstruct these communities is significant. The allocation of resources towards the international community's response, which includes peacekeeping missions, humanitarian aid, and development assistance, is perceived as a burden on the global economy. Contemporary disputes frequently entail multiple stakeholders, each with distinct objectives, thereby rendering diplomatic resolution more intricate and expensive. Furthermore, the widespread incorporation of technology in military operations, ranging from cyber warfare to unmanned aerial vehicles, has escalated the economic costs linked with peacekeeping efforts.

Sub questions

Question Number : 7 Question Id : 6406531953262

Correct Marks : 2

Question Label : Multiple Choice Question

Fill in the blank with the appropriate verb.

These factors (1) ____ the expenses associated with peace-building.

Options :
